

Der Satz des Pythagoras - einfache Übungen

Berechne die gesuchten Strecken:

$$a = 8 \quad b = 7 \quad \mathbf{c = ?}$$

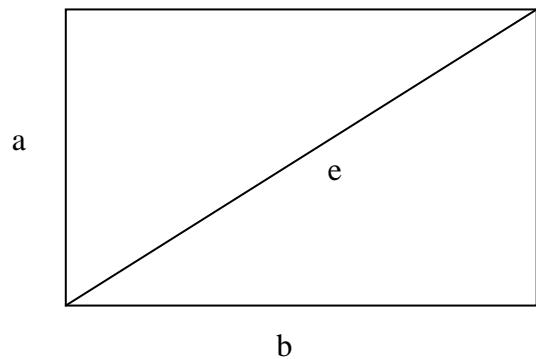

alle Angaben in cm

$$b = 11 \quad h = 4 \quad \mathbf{q = ?}$$

$$a = 17 \quad q = 8,5 \quad \mathbf{h = ?}$$

$$b = 8,5 \quad q = 6,8 \quad p = 3,2 \quad \mathbf{a = ?} \quad \mathbf{h = ?}$$

$$\begin{aligned} q &= 6 \\ h &= 14,7 \\ c &= 10,2 \\ e &= 10,6 \end{aligned}$$

$$a = 8 \quad b = 4,5 \quad \mathbf{e = ?}$$

$$e = 16,8 \quad b = 3,1 \quad \mathbf{a = ?}$$

$$a = 0,5 \quad e = 1,7 \quad \mathbf{b = ?}$$

$$\begin{aligned} q &= 1,6 \\ a &= 16,5 \\ e &= 9,2 \end{aligned}$$
